1969 Corvette Restoration

Dear Bill:

I wanted to thank-you for the terrific job on the restoration of my 1969 Corvette. From the time when we first sat down to discuss the project to the day you delivered it to my home, you have been the consummate professional. It's a rare find these days to find someone that strives and delivers perfection in his work.

I would be remiss if I didn't mention all the guys in the shop and Tricia. I felt like everyone working on the project cared as if they were the owner of this special car. Tricia's attention to detail with billing and communication was extraordinarily helpful. The weekly project photos were great. Being able to chronologically detail the project from start to finish was so helpful for me living two hours away from the shop. I was able to talk to you about the project effectively, allowing us to collaborate on every detail. It also provided a way for me to share the progress with my friends and family with a complete digital photo restoration record.

Your experience and guidance during the project helped create the exact car that I envisioned. It truly is a dream car. I tell everyone about B&C and say "There is nobody better for a project like this". Thank-you.

Sincerely

Edward A Dwyer DDS
